QUOTE:

"yo dude which linux distro do you use?"

name:

Daniel

age:

18-22

profession:

CS student
Software intern

Bio:

Needs to process data. Wants to mathematically optimize productivity

interests:

Hardcore personal projects

hackathons

Gaming (has to minimize distraction from this)

Goals:

Maximize productivity to boost resume

Analyze routine with data

likes/dislikes:

Likes studying different programming languages except html

Dislikes people who calls him a CS nerd

powers:

Very familiar with tech

Wants a lot out of his timer, because if he doesn't get it he'll make one himself (will definitely criticize yours)

daily routine:

Wake up at 9 am, watch lectures until 2pm. work on personal projects until 6pm. plays league of legends until 11pm. goes to sleep after watching 6 episodes of anime

motivation:

Uses all sorts of devices: desktop, phone, smart fridge, etc.

BE CREATIVE!

QUOTE:

"I chose Nursing because I wanted to help people. Now I wanna die"

name:

Jessica

age:

18-28

profession:

Med student

Bio:

Dead inside from all the years of school she has to do. Just wants to study in peace since she doesn't have anything else to do

interests:

Watching TikToks in between assignments

Watching the Office because she thinks that's a personality

Starbucks/Philz

Goals:

Trying to escape the soul crushing reality of her profession

Just wants a simple aesthetic timer to keep her away from TikTok/YouTube binges while she crams ochem.

likes/dislikes:

Coffee
Fairy lights in her dorm
Posting activist
Instagram stories
complaining about things

Dislikes:
Complicated technology
CS majors
Ochem

powers:

Can stay awake for 36 hours to finish her lab's research papers if she needs to.

Familiar enough with tech to use phone+laptop

daily routine:

Wake up at 5am, go to starbucks, tell everyone they're in med school/premed

motivation:

3-5 year old MacBook
(not M1, shitty Intel core duo)
iphones only

BE CREATIVE!

QUOTE:

"Cash Rules Everything Around Me"

name:

Mark Cuban

age:

52

profession:

Investor
Shark Tank host
Mavericks owner

Bio:

Dallas Mavs Owner
Billionaire
Shark Tank Host
Businessman
Highly motivated
person
Middle-aged

BE CREATIVE!

interests:

Investing in small businesses.

Making a lot of money

Basketball

Cooking

Goals:

Becoming a trillionaire

Spending more time with kids

Make sure to take breaks while working to avoid fatigue.

likes/dislikes:

Likes buying GME
Insider trading
likes
$$$$$$$$$$
$$$$$$$$
$$$$$$$
Dislikes: people who think the Mavericks suck
r/wallstreetbets

powers:

Fairly familiar with tech because he needs it to invest, but not an expert.

Knows how to restart the router.

daily routine:

Wake up at 4am, work out until 7am. Arrive at shark tank set at 10am and invest in companies until 4pm. Go home and play with kids until 9pm. Goes to bed at 10pm.

motivation:

Probably something he owns shares in

QUOTE:

"Can I speak to the manager?"

name:

Karen

age: 45

Profession:

mom

Bio:

average stay-at-home mom, with an average knowledge of technology. nothing really crazy to keep track of in her life

BE CREATIVE!

interests:

Real estate

Talking to your manager

Divorcing her 6th husband

Home aesthetics

Goals:

Wants to work on her "eat pray love" coasters without getting distracted by puppy videos

Wants to be more productive at work so her boss takes her out to dinner (she WILL yell at the waiter)

likes/dislikes:

dislikes newfangled tech
likes familiarity

Powers:

Finding bugs in her meals at restaurants

Driving a white minivan

Can use technology, but needs to ask kids to reset router

daily routine:

busy with kids, playing Candy Crush, or posting to Facebook

motivation:

Interface in her new car, phone, home computer

QUOTE:

"Stop your yimmer-yammering you no good tech nerds!"

name: Boe Jiden

age: 82

profession:

Carpenter
Retiree

Bio:

May or may not have been a senator. Mostly retired by now.

interests:

Relaxing by the record player
Hair sniffing
Spending time with the grandkids
Carpentry

powers:

Very limited technology use, doesn't even tweet from own phone

Goals:

Reduce stress so he can survive his term
Be more focused with his work so he has more time for hobbies

Needs timer as reminder to take breaks to reduce eye-strain

daily routine:

Morning "jog", complain about his wife, put in dentures, eat blended waffle and eggs, work on his carpentry, complain about his wife

likes/dislikes:

Likes spending time with his grandkids and eating ice cream
Dislikes loud noises and bright colors

motivation:

iPhone or old Android with font size 40pt

Daniel

As a programmer frequently trying to allocate time for personal projects, I want to improve my estimation skills with meta-analysis and cool graphs.

As a hardcore gamer, I want something that stops me from playing TFT when I'm working

Jessica

As a young and hip Gen-Z kid, I need something to keep me from getting distracted by my tik-toks and twitters

As a current med school student, it is imperative that I am able to maximize my productivity and have everything laid out for me so I can try and get 5 hours of sleep a night and still have time to let everyone know I don't get enough sleep and am in medschool.

As a med student, I want a timer that I can use without thinking about it, for when I'm crashing after my venti caramel macchiato with no whip and extra caramel drizzle

Mark Cuban

As an investor it is hard to make time for my hobbies, I'm looking for a timing solution that enables me to balance work with hobbies / relaxing activities.

I want a no nonsense timer that just works and is reliable, because time is money, potentially being something I can invest in

Karen

As a busy single-mother with a job I want to boost my productivity to work faster and have more time for my kids

As a mother I want to make sure that I am being productive while working and making up for time that I am distracted by my kids.

Boe Jiden

As a busy man that is trying to balance my hobby of carpentry with drafting legislation, I want to be able to manage my time efficiently.

As a patient of early dementia, I want an app that is intuitive enough to organize my time without having to ask my grandkids.

As an old school kind of guy, I want something that looks close enough to a real mechanical timer.

miro

Core Pomo Features

25 minute timer

short break (each pomo)

long break (every 4 pomos)

start/stop button (not pause)

task list

Advanced Features

task list w/estimated pomos per task

Auto break allocation

# of pomos until long break

Elon Tier (nice to have)

Success/failure prompt per task
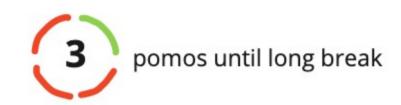

estimated vs. actual # of pomos (efficiency and accuracy data)

Long-term analytics per user?!
